

PEST B GONE INC WILL BE CONDUCTING A REGULAR INSPECTION

RESIDENCE ON _____ BETWEEN 9 AM TO 5 PM.

NOTICE OF BEDBUG INSPECTION

Dear Residents,

As part of our commitment to maintaining a clean and pest-free living environment, management will be conducting **bedbug inspections** in select units. This initiative is in response to an increase in bedbug infestations across the **Greater Toronto and Hamilton Area (GTHA)** and aims to identify and address potential concerns proactively.

What to Expect During the Inspection

- Our trained pest control professionals will thoroughly inspect **beds, sofas, and chairs** for any signs of bedbug activity.
- The inspection will be **non-invasive**, requiring only a visual examination of common bedbug hiding spots.

Important Notes

- **No treatment will be conducted during this inspection.** If bedbugs are found in your unit, management will contact you to schedule treatment at a later date.
- Residents are **not required to vacate their units** during the inspection, but we kindly ask for your cooperation in allowing access to the necessary areas.
- If you have any questions or concerns regarding the inspection process, please contact management for further clarification.

We appreciate your cooperation and understanding as we take these initiative-taking steps to ensure a **safe and comfortable** living environment for all residents.

Sincerely,
Pest B Gone

Thank you for your cooperation!
