

PEST B GONE INC WILL BE PROVIDING TREATMENT FOR THE CONTROL OF
BEETLES

AT YOUR RESIDENCE ON _____
BETWEEN 9 AM TO 5 PM.

Preparation for Treatment:

Please ensure that the unit is prepared for treatment upon the technician's arrival. We ask that you be mindful of the technician's time, as well as the other residents waiting for treatment. Technicians cannot wait, so if you are not prepared, the treatment will be canceled, and a cancellation fee will apply.

Mandatory Evacuation Period:

All adults and children

All individuals and pets must vacate the premises for a minimum of FOUR (4) hours after treatment. Individuals with allergies, respiratory issues, or who are pregnant should vacate for at least ****SIX (6) HOURS**.

Caged Pets Protocol:

Remove any birds and other caged pets (including fish and reptiles) from the residence during treatment. For fish tanks, turn off pumps and filters, and cover the tank with plastic wrap. Wait ****24 hours**** before reintroducing exotic animals.

PRIOR TO TREATMENT

1. Clear Clutter:

Remove unnecessary items and clutter from the affected areas. This includes cardboard boxes, old newspapers, and unused items that can provide hiding places for beetles.

2. Vacuum Thoroughly:

Vacuum all carpets, rugs, and upholstered furniture to remove visible beetles, larvae, and droppings. Pay special attention to corners, edges, and behind furniture. Dispose of the vacuum bag or contents immediately.

3. Clean Up Food Sources:

Remove all food items from cabinets, drawers, and countertops. Store food in airtight containers to prevent attracting beetles or weevils

4. Inspect and Seal Cracks:

Check for and seal any cracks and entry points around windows, doors, and baseboards to help prevent the re-entry of beetles.

5. 6. Move Furniture and Appliances

6. Move furniture and appliances away from walls to allow access for treatment. Ensure that hidden areas are accessible.

AFTER THE TREATMENT

1. Do Not Clean Immediately:

Avoid vacuuming or cleaning treated areas for at least ****7 days**** after the treatment to allow the treatment to work effectively on any remaining beetles and larvae.

2. Monitor for Beetle Activity:

Keep an eye out for any signs of beetle activity after treatment. If you notice continued presence or any new sightings, contact Pest B Gone Inc. for a follow-up evaluation.

3. Maintain Regular Cleaning:

After the waiting period, continue to vacuum and clean regularly to help prevent future infestations and to remove any remaining dead beetles.

4. Seal New Entry Points:

After treatment, inspect your home for any additional potential entry points for beetles and seal them with caulk or silicone to help prevent future infestations.

5. Follow-Up Treatment:

If there are still signs of beetle activity after the initial treatment, please contact us for a follow-up consultation and potential additional treatments.

Monitor for Activity

After treatment, check the areas for any signs of continued drain fly activity. If you notice any new activity, contact us immediately for follow-up evaluation.

No Pesticides or Cleaning Products

Do not spray any pesticides or cleaning products in treated areas after the treatment, as this may lead to control failure.

Pest B Gone

Thank you for your cooperation!
