193 Snowshoe Crescent
Thornhill, Ontario L3T

Dear Resident,

The management has scheduled a full-building pest treatment to address cockroach infestations.

This treatment will be **chemical-free**—no sprays will be used. Instead, we will apply a pest control paste to various areas of your kitchen and bathroom cabinetry. Boric acid powder will be placed behind your refrigerator and stove, and an insect monitor will be placed under your sink.

We will be entering your apartment on

between **9:00 AM and 5:00 PM** to conduct the treatment.

This is a **non-prep treatment**, meaning **you do not need to empty your cupboards** in the kitchen. Additionally, there is **no need to remove pets** or leave your unit during or after the treatment.

However, we kindly ask that you **clear the space beneath your kitchen counter and bathroom sink, especially around areas where pipes enter the walls.**

To ensure access, please confirm that the office has a key to your unit. If you have a secondary security lock, either provide a key to the office or leave the lock unlocked on the day of treatment.

We appreciate your cooperation in keeping our building pest-free.

Sincerely,
Pest B Gone Inc.
